● ● Easy, Safe Laundry Tips

Clean and disinfect carts, baskets, and hampers. If available, use a bag liner.

Wipe down machine buttons, knobs, and door handles before and after each use.

Use a disinfecting wipe or pre-sprayed paper towel. Do not spray cleaner directly onto machine surfaces.

Do not shake dirty laundry.

This will minimize the possibility of dispersing the virus through the air.

Use the warmest water setting for your items.

Follow garment instructions. Experts recommend a temperature of at least 140° when appropriate.

Use the right amount of soap.

Excess suds from using too much soap can actually trap dirt and grime inside fabric.

Machine-dry your clothes.

Viruses don't like heat. So if garment instructions allow, machine-dry your clothes.

We care about the health of our community. We are here to help make this time easier for you. You can depend on us.
